

Support Production Information

Encore works diligently to verify regional and off-set well production data in the areas that the Company operates. Encore further utilizes this verified production information along with independent third-party geology and other pertinent reports to generate and support realistic projections, target rates and other estimates for each investment partnership.

Although no assurances can be made as it relates to the actual production, reserves, profit, income or any other estimate for any given oil and gas project, Encore strives to provide each qualified investor with reasonable estimate projects for each investment, supported by actual off-set production data, third-party recommendations, Kentucky production database and other pertinent reports, both official and unofficial reports.

For more information, please contact Joseph Hooper at (270) 842-1242, ext. 224 or at joseph.hooper@encore-energy.com
